

IB PSYCHOLOGY HL
(Internal Assessment Criteria)

Name (s) _____

A Introduction

Marks	Level Descriptor
0	<ul style="list-style-type: none">• There is no introduction or the background research presented is not made relevant to the experimental hypothesis.• The aim of the study is not stated.• No hypotheses are stated.
1 - 3	<ul style="list-style-type: none">• Background theories and/or studies are identified but are limited in number, not well explained and/or not highly relevant to the hypotheses.• The aim of the study is clearly stated.• The experimental and or null hypotheses are stated but are unclear or not operationalized.• The prediction made in the experimental hypothesis is not clearly justified by the background studies and/or theories.
4 - 5	<ul style="list-style-type: none">• Background theories and/or studies are adequately explained and highly relevant to the hypotheses.• The aim of the study is clearly stated.• The experimental and null hypotheses are appropriately stated and operationalized.• The prediction made in the experimental hypothesis is justified by the background studies and/or theories.

COMMENTS:

B Method: Design

Marks	Level Descriptor
0	<ul style="list-style-type: none">• The independent variable and dependent variable are not accurately identified.• No appropriate experimental design is identified.• There is no evidence of appropriate application of ethical guidelines, for example, there is no evidence that informed consent was obtained from participants or their parents.
1	<ul style="list-style-type: none">• The independent variable and dependent variable are accurately identified but not operationalized.• The experimental design is appropriate to the aim of the research but its selection has not been appropriately justified.• There is a clear indication and documentation of how ethical guidelines were followed.
2	<ul style="list-style-type: none">• The independent variable and dependent variable are accurately identified and operationalized.• The experimental design is appropriate to the aim and its use is appropriately justified.• There is clear indication and documentation of how ethical guidelines were followed.

COMMENTS:

C Method: Participants

Marks	Level Descriptor
0	<ul style="list-style-type: none">• No relevant characteristics of the participants are identified.• No relevant sampling technique is identified or the sampling method is incorrectly identified.• The target population has not been identified.
1	<ul style="list-style-type: none">• Some characteristics of the participants are identified but not all are relevant. Some relevant participant characteristics have been omitted.• The sample is selected using an appropriate method but the use of the method is not explained.• The target population has been identified and is appropriate.
2	<ul style="list-style-type: none">• Relevant characteristics of the participants are identified.• The sample is selected using an appropriate method and the use of this method is explained.• The target population has been identified and is appropriate.

COMMENTS:

D Method: Procedure

Marks	Level Descriptor
0	<ul style="list-style-type: none">• No relevant procedural information is included.• The information provided does not allow replication.• There are no details of how the ethical guidelines were applied.
1	<ul style="list-style-type: none">• The procedural information is relevant but not clearly described, so that the study is not easily replicable.• Details of how the ethical guidelines were applied are included.• Necessary materials have not been included and referenced in the appendices.
2	<ul style="list-style-type: none">• The procedural information is relevant and clearly described, so that the study is easily replicable.• Details of how the ethical guidelines were applied are included.• Necessary materials have been included and referenced in the appendices.

COMMENTS:

E Results: Descriptive

Marks	Level Descriptor
0	<ul style="list-style-type: none">• There are no results or the results are irrelevant to the stated hypotheses of the student's experimental study.• Relevant descriptive statistics have not been applied to the data.• There is no graphing of the data.
1	<ul style="list-style-type: none">• Results are stated and accurate and reflect the hypotheses of the research.• Descriptive statistics (one measure of central tendency and one measure of dispersion) are applied to the data, but their use is not explained.• The graph of results is not accurate, is unclear or is not sufficiently related to the hypotheses of the study.• Results are not presented in both words and tabular form.
2	<ul style="list-style-type: none">• Results are clearly stated and accurate and reflect the hypotheses of the research.• Appropriate descriptive statistics (one measure of central tendency and one measure of dispersion) are applied to the data and their use is explained.• The graph of results is accurate, clear and directly relevant to the hypotheses of the study.• Results are presented on both words and tabular form.

COMMENTS:

F Results: Inferential

Marks	Level Descriptor
0	<ul style="list-style-type: none">• No appropriate inferential statistical test has been applied.
1	<ul style="list-style-type: none">• An appropriate inferential statistical test has been chosen but not properly applied
2	<ul style="list-style-type: none">• An appropriate inferential statistical test has been chosen and explicitly justified.• Results of the inferential statistical test are not complete or may be poorly stated.
3	<ul style="list-style-type: none">• An appropriate inferential statistical test has been chosen and explicitly justified.• Results of the inferential statistical test are accurately stated.• The null hypothesis has been <i>accepted</i> or rejected appropriately according to the results of the statistical test.• A statement of statistical significance is appropriate and clear.

COMMENTS:

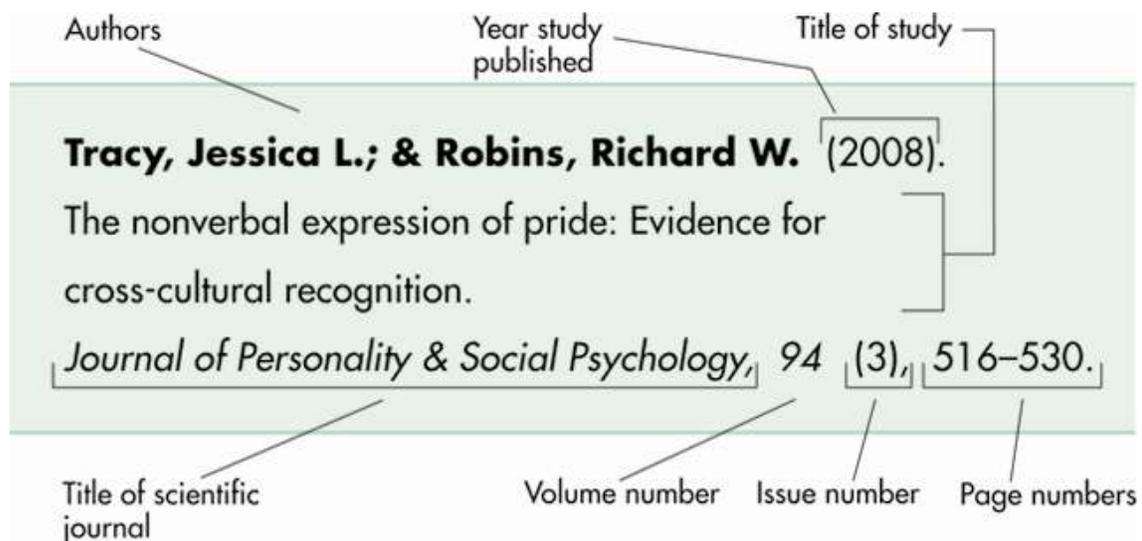

G Discussion

Marks	Level Descriptor
0	<ul style="list-style-type: none">• There is no discussion section, or the discussion of the results is irrelevant to the hypotheses.
1 - 2	<ul style="list-style-type: none">• Discussion of the results is very superficial.• The findings of the student's experimental study are not compared to the study being replicated.• Limitations of the design and procedure are not accurately identified.• No modifications are suggested and there is not conclusion.
3 - 5	<ul style="list-style-type: none">• Discussion of the results is not well developed or is incomplete (for example, discussion of either the descriptive or inferential statistics is missing).• The findings of the student's experimental study are mentioned with reference to relevant background studies and/or theories.• Some relevant limitations of the design and procedure have been identified, but a rigorous analysis method is not achieved.• Some modifications are suggested.• The conclusion is appropriate.
6 - 8	<ul style="list-style-type: none">• Discussion of results is well developed and complete (for example, descriptive and inferential statistics are discussed).• The findings of the student's experimental study are discussed with reference to relevant background studies and/or theories.• Limitations of the design and procedure are highly relevant and have been rigorously analyzed.• Modifications are suggested and ideas for further research are mentioned.• The conclusion is appropriate.

COMMENTS:

H Citation of Sources

Marks	Level Descriptor
0	<ul style="list-style-type: none">• Sources are not cited within the report.• No references are provided, or no standard citation method is used.
1	<ul style="list-style-type: none">• The references are incomplete or a standard citation method is not used consistently.
2	<ul style="list-style-type: none">• All in-text citations and references are provided.• A standard citation method is used consistently throughout the body of the report and in the references section.

COMMENTS:

I Report Format

Marks	Level Descriptor
0	<ul style="list-style-type: none"><li data-bbox="396 247 1230 283">• The report is not within the word limit of 1,500-2,000 words.<li data-bbox="396 321 1354 394">• Required sections of the report are missing, for example, no abstract is included.<li data-bbox="396 432 948 468">• Appendices are missing or incomplete.
1	<ul style="list-style-type: none"><li data-bbox="396 548 1182 583">• The report is within the word limit of 1,500-2,000 words.<li data-bbox="396 621 1133 657">• The report is complete but not in the required format.<li data-bbox="396 695 1386 768">• Appendices are not labeled appropriately and/or are not referenced in the body of the report.<li data-bbox="396 806 1412 879">• The abstract is poorly written and does not include a summary overview of the student's experimental study, including the results.
2	<ul style="list-style-type: none"><li data-bbox="396 961 1182 997">• The report is within the word limit of 1,500-2,000 words.<li data-bbox="396 1035 1089 1071">• The report is complete and in the required format.<li data-bbox="396 1108 1406 1182">• Appendices are labeled appropriately and are referenced in the body of the report.<li data-bbox="396 1220 1357 1293">• The abstract is clearly written and includes a summary overview of the student's experimental study, including the results.
