

STRATEGIES FOR *SUCCESS*

(AP Statistics)

- **PAY ATTENTION IN CLASS**

- “Catch yourself” when you begin to daydream and “force” yourself to become more engaged during a lesson
- “Ignore” and/or avoid distractions (noises, friends in class etc) during a lesson
- Take notes

HONESTLY TRY EVERY PROBLEM FROM EVERY ASSIGNMENT

- Read the textbook/section summaries before beginning an assignment
- Attempt to do your assignment on the day you have class- NOT days later
- Look for examples in your textbook
- For odd numbered problems, try to use the answer(s) to get the answer
- View “video lessons” from www.khanacademy.org
- Use the Rose Hulman’s Homework Hotline (1-877-ASK-Rose)
- Have a *study buddy*!

- **KNOW WHY AN ANSWER WAS INCORRECT**

- Using a colored pen or pencil, mark the problem(s) you miss when the assignment is reviewed

- **USE STUDY TIME WISELY**

- Use the time to work on assignments and ask questions

- **STUDY FOR TESTS**

- Review notes (online?)
- Review every problem from every assignment and know how to do each one
- Honestly do the Practice Test
- Honestly do the “Chapter Review Exercises”
- Work with your study buddy
- Attend the review session on the morning of a test (7:30 – 8:30)

- **LEARN FROM THE MISTAKES YOU MAKE ON A TEST**
