

QUESTIONS FOR *SUCCESS*

(Honors Geometry)

Are you unhappy with your performance in Honors *Geometry*? Then first ask yourself...

- Do I have the math aptitude, (Algebra I) skills and *attitude* to be in an honors math course? Do I want to do better? Do I care?

If the answer to these questions is "yes", then ask yourself...

- Do I pay attention in class? Do I "catch myself" when I begin to daydream and "force" myself to become more engaged during a lesson? Do I "ignore" and/or avoid distractions (noises, friends in class etc) during a lesson? Do I take notes?
- Do I value assignments? Do I *honestly* try every problem from every assignment? Do I look for examples in my textbook? Do I attempt to do my assignment on the day I have class or days later? Do I ever use the PHSchool.com website to help me with selected problems? Do I ever use Rose Hulman's Homework Hotline (1-877-ASK ROSE)? Do I have a *study buddy*?
- Do I use study time wisely (to work on assignments and ask questions)? Do I take online quizzes after each section available at PHSchool.com?
- Do I "grade" my assignments when they are reviewed and mark the ones I miss (with a colored pen or pencil)? Do I know why I missed the ones I did?
- Do I study for tests?
 - Do I memorize the facts and formulas? Do I use the flash cards on Frankum's webpage* to help me memorize them?
 - Do I review every problem from every assignment and know how to do each one?
 - Do I *honestly* do the Review Problems provided to me before a test... the Chapter Review Problems from the book?
- Do I learn from the mistakes I made on a test?
