

ECA Algebra Review (Geometry)
Day 7a

1) Solve by factoring. $x^2 + 3x - 10 = 0$	2) Solve using square roots. $2x^2 - 98 = 0$
3) Solve using the quadratic formula. $2x^2 + 4x - 4 = 0$	4) Solve. $(p + 7)^2 = 81$
5) Graph. $f(x) = x^2 + 3x - 4$ 	6) Find the roots. $x^2 - 8x - 9 = 0$

ECA Algebra Review (Geometry)
Day 7b

1) Solve by factoring. $x^2 - 15x + 50 = 0$	2) Solve using square roots. $4x^2 + 256 = 0$
3) Solve using the quadratic formula. $3x^2 + 7x - 4 = 0$	4) Solve. $(p - 13)^2 = 144$
5) Graph. $f(x) = x^2 + x - 6$ 	6) Find the roots. $x^2 - 8x + 16 = 0$
